Smart-Speaker „Sirium1000ABT"

THE IDEAL COMPANION

Exhilarating garden parties with DJ Alexa? No problem! The "SIRIUM1000ABT" speaker can operate off the grid for up to 8 hours, and Alexa keeps working even without a connection to the router. Just create a wifi hotspot, pair the speaker and get the party started!

Spotify Connect – unlimited musical enjoyment

With Spotify Connect you can enjoy music wherever you like. Smartphone, PC and in future also directly via your soundbar – when changing the player music starts exactly at the place where you stopped it before. Millions of songs and always the most current hit lists at the touch of a button – this is Spotify Connect!
Amazon Alexa voice control on board

The Hama 'SIRIUM2000AMBT' soundbar connects to the cloud-based Alexa Voice Service to play back music, set alarms and timers, make calls, call up the weather, the calendar, the traffic situation and sports results, manage the shopping list, or to just ask questions or control compatible smart home devices. Simply ask for a song, artist or genre from Amazon Music, Spotify, Tun-eIn and other services. Furthermore, audio books, radio stations, the news and much more can be played. Make calls and send messages to others who have a device with Amazon Alexa. Or quickly connect to other Alexa-enabled devices in your home using just your voice.

Bluetooth streaming – music transmission from a smartphone or tablet PC

There is a super wide choice but there is nothing like your own music. Thanks to Bluetooth you can stream your favourite songs quickly and easily from your smartphone, tablet, notebook or PC to the soundbar. Simply pair the soundbar and your device and enjoy your favourite music!
