GB Operating Instructions

Thank you for choosing a Hama product.

Take your time and read the following instructions and information completely. Please keep these instructions in a safe place for future reference. If you sell the device, pass on the illustrated quick start guide and the safety instructions in printed form to the new owner.

1. Explanation of warning symbols and notes

Warning

This symbol is used to indicate safety instructions or to draw your attention to specific hazards and risks.

Note

This symbol is used to indicate additional information or important notes.

2. Package contents

- TV bracket
- VESA arms (2x)
- Mounting pillar
- Base plate
- Mounting kit
- Safety instructions, illustrated quick start guide

Mounting kit

A1		M10 (x1)	D3		M8x30 (x4)
A2		M6 (x4)	D4		M8x50 (x4)
A3		M8x25 (x3)	E1		M4x12 (x4)
A4		M6x14 (x4)	E2		M4x20 (x4)
A5		M10 (x1)	F1		(x6)
B1		M6 (x4)	F2		5x5 (x1)
B2		M8x10 (x4)	F3		10 mm (x1)
B3		M8x20 (x4)	F4		17 mm (x1)
C1		M6x12 (x4)	F5		(x1)
C2		M6x20 (x4)	F6		(x1)
D1		M8x12 (x4)	F7		(x1)
D2		M8x20 (x4)			

* M8x50 + Ø 8x5 = M8x45

Note

Please check the mounting kit for completeness before installing the bracket and ensure that there are no faulty or damaged parts.

3. Additionally required tools

Note

Never install the bracket alone. Seek assistance and help!

4. Safety instructions

Warning

- Given the multitude of terminal devices and wall structures available on the market, the supplied mounting kit is unable to cover every option.
- It occasionally happens that the screws for attaching the device to the bracket are too long.
- Read the operating instructions for your terminal device before attempting to mount it. The instructions provide information about the type and dimensions of suitable fastening materials.
- If the supplied mounting kit does not contain suitable fastening materials for mounting the terminal device, purchase these from a specialised dealer.
- Never apply force during mounting. This can damage your device or the bracket.
- If in doubt, have this product installed by a qualified technician - do not attempt to install it yourself!
- Once you have mounted the product and the attached load, check that they are sufficiently secure and safe to use.
- You should repeat this check at regular intervals (at least every three months).
- Ensure that the product does not exceed its maximum permitted carrying capacity and that no load exceeding the maximum permitted dimensions is attached.
- Make sure that the product is loaded symmetrically.
- Maintain the necessary safety clearance around the attached load (depending on the model).
- In the event of damage to the product, remove the attached load and stop using the product.
- Do not attach any additional objects to the product.

5. Application and specifications

- The bracket is used for mounting flat screens in private, non-commercial households.
- The bracket is intended only for use inside buildings.
- Use the bracket only for the intended purpose.

6. Preparation and mounting

Note

- Never install the bracket alone. Seek assistance and help!
- Different terminal devices have different connections for cabling and other devices. Before commencing the installation, check whether the necessary connections can still be reached after mounting.
- Depending on the product and mounting method, you may not need all parts of the mounting kit. It is therefore possible that unneeded screws and other small parts will be left over even after correct mounting. Keep these in a safe place together with these operating instructions for use for later reference (sale of the product, moving house, relocation of the bracket, new TV, etc.).

Warning

- Only set the product up on even, non-slip surfaces with a sufficient load-bearing capacity for the product and the device attached to it.
- Make sure that children do not use the product for climbing.
- Please note that subsequent height adjustment is only possible by dismantling the suspension fitting.

6.1 Assembly preparation

6.1.1 Attaching the rubber feet

Note

- The base plate [G1] is made of safety glass - please check it for any damage before installation.
- Small splinters of glass can lead to injuries if touched. Dispose of the product immediately if it is damaged and/or splintered during installation or use.
- Only touch the damaged or splintered product on undamaged areas and at the edge.
- Be very careful while doing so, thoroughly wash your hands afterwards and avoid contact with the face and eyes.

- Turn the base plate [G1] with the shiny underside facing upwards.
- Attach the self-adhesive rubber feet [F1] to the corners of the base plate as shown above.
- Then turn the base plate again with the matt side facing upwards.

6.1.2 Mounting the mounting pillar on the base plate

- Connect the mounting pillar [G2] and the base plate [G1] using the connecting piece [F5].
- Then secure the individual parts with the mounting plate [F6] and the screws [A3]. Use the Allen key [F2] to do this.

6.1.3 Fitting the mounting joint and mounting plate

- Connect the mounting column [G2] and the mounting joint [G3] using the screw plate [F7].
- Secure the mounting joint [G3] with the washer [A1] and the screw nut [A5].
- Use the larger open-end spanner [F4].

- Position the mounting plate [G4] at the desired height.
- Secure it with the screws [A4] and the nuts [A2] using the smaller spanner [F3].

6.2 Mounting on the TV set

Note

- Given the multitude of terminal devices structures available on the market, we cannot describe all possible mounting versions here.
- Please ensure that the bracket lays flat and evenly on the back of the television.
- Use the enclosed spacer to even out any unevenness on the back of the television.
- Ensure that all screws have the proper length and can be mounted until they are hand-tight.

6.2.1 Mount the VESA arms on the back of the TV set

Flat TV back

Curved TV back

★ You do not need a washer for the D-screws

- Mount the VESA arms [G5] on the back of your TV set.
- Ensure that the VESA arms are correctly aligned. The two hooks must point downwards.
- Note the combination of screw, washer and spacer listed above for your flat or curved TV.

6.3 Mounting the TV on the TV stand

Get support and help from other people for the following assembly step.

- Hang the TV set with the mounted VESA arms on the bracket as shown above.
- Lock the safety device by tightening the screws.

6.4 Cable management

- Use the openings on the mounting pillar for cable management.

7. Adjustment & maintenance

Note

Never adjust the bracket alone. Seek assistance and help!

Note - tiltable / full-motion brackets

- Ensure that no electrical cables are crushed or damaged during installation or adjustment.
 - During adjustment, ensure that the product is loaded symmetrically and that the maximum permitted carrying capacity is not exceeded.
-
- Check the strength and operational safety of the bracket and the load attached to it at regular intervals (at least quarterly).
 - Clean the bracket only with water or commercially available household cleaners.

8. Setting options

4x
height-adjustable

60°
swivel

-12°/+5°
tilt

Rotates around
6°

- If the swivelling function is stiff, loosen the screw nut [A5] on the joint slightly (see Fig.: a).
- If the horizontal alignment of your TV set needs to be subsequently adjusted on the mounting plate [G4], loosen the screw nuts [A2] (see Fig.: b), align the set as required and then retighten them.
- No screws need to be loosened to adjust the tilt.
- The resistance for the tilt adjustment can be readjusted using the corresponding screw nuts on the VESA arms (see Fig.: c).

9. Technical data

Maximum load:	40 kg
Screen diagonal:	81.0 - 191.0 cm (US: 32" - 75")
Height of centre point of TV plate:	108.5 cm
Tilt:	-12°/+5° (depending on device)
Swivel range:	up to 60° (depending on device)
Base plate dimensions:	50 x 70 cm
Mount:	Compliant with VESA standard: 75 x 75 100 x 100 100 x 200 100 x 300 100 x 400 200 x 100 200 x 200 200 x 300 200 x 400 300 x 100 300 x 200 300 x 300 300 x 400 400 x 100 400 x 200 400 x 300 400 x 400 500 x 100 500 x 200 500 x 300 500 x 400 600 x 100 600 x 200 600 x 300 600 x 400

10. Warranty disclaimer

Hama GmbH & Co KG assumes no liability and provides no warranty for damage resulting from improper installation/mounting, improper use of the product or from failure to observe the operating instructions and/or safety notes.

11. Service and support

Please contact Hama Product Consulting if you have any questions about this product.

Hotline: +49 9091 502-0 (German/English)

Further support information can be found here: <https://hama.com>

12. Warranty conditions

For this product, HAMA GmbH & Co KG grants you an extended manufacturer's warranty for freedom from defects, usability, workmanship and the durability of the materials used for a period of 10 years. Excluded from the guarantee is the compatibility of the product with future standards of further developed hardware.

Within the specified period, Hama GmbH & Co KG will remedy a justified warranty claim at its own discretion, free of charge, either by repair or replacement.

The warranty period begins on the date of purchase of this product and is valid throughout the EU.

The warranty granted is in addition to and does not affect your statutory rights. Damage caused by improper use, normal wear and tear, exposure to chemicals or force majeure, as well as tampering or repairs by you or third parties, are excluded from the warranty.

Furthermore, accessories that are not part of the basic equipment of the product (promotional parts) are excluded from the warranty.

In the event of a warranty claim, please contact us at Hama GmbH & Co KG, Dresdner Str. 9, 86653 Monheim, Germany, enclosing proof of purchase. You are also welcome to contact us at www.hama.de or by phone on +49 (0)9091/502-0.
